**Appreciative Inquiry A Positive Revolution**
Appreciative inquiry (AI) is a model that seeks to engage stakeholders
in self-determined change. According to Bushe "AI revolutionized the
field of organization development and was a precursor to the rise of
positive organization studies and the strengths based movement in
American management."

Depending on which theory of utility is used, the interpretation of marginal utility can be meaningful or not. Economists have commonly described utility as if it were quantifiable, that is, as if different levels of utility could be compared along a numerical scale. This has affected the development and reception of theories of marginal utility.
