History. The term endocrine disruptor was coined at the Wingspread Conference Centre in Wisconsin, in 1991. One of the early papers on the phenomenon was by Theo Colborn in 1993. In this paper, she stated that environmental chemicals disrupt the development of the endocrine system, and that effects of exposure during development are often permanent.

Endocrine disruptor - Wikipedia
Cushing disease (hyperadrenocorticism) may be divided into two broad categories. One category, pituitary-dependent hyperadrenocorticism, arises from adenomatous enlargement of the pituitary gland, resulting
in excessive ACTH production.
