Fundamentals of Anatomy & Physiology - Corexcel

This site was designed for students of anatomy and physiology. It contains textbook resources, such as chapter review guides, homework sets, tutorials, and printable images. Each chapter has a practice quiz and study tips for learning the topic.

Anatomy & Physiology - The Biology Corner

Cortex. In a dissected kidney, it is easy to identify the cortex; it appears lighter in color compared to the rest of the kidney. All of the renal corpuscles as well as both the proximal convoluted tubules (PCTs) and distal convoluted tubules are found here. Some nephrons have a short loop of Henle that does not dip beyond the cortex. These nephrons are called cortical nephrons.

25.3 Gross Anatomy of the Kidney - Anatomy and Physiology

Chapter 10 - Respiratory System

STRUCTURE AND FUNCTION. Morton Lippmann. The respiratory system extends from the breathing zone just outside of the nose and mouth through the conductive airways in the head and thorax to the alveoli, where respiratory gas exchange takes place between the alveoli and the capillary blood flowing around them.

Chapter 10 - Respiratory System

Immunology is a branch of biology that covers the study of immune systems in all organisms. Immunology charts, measures, and contextualizes the physiological functioning of the immune system in states of both health and diseases; malfunctions of the immune system in immunological disorders (such as autoimmune diseases, hypersensitivities, immune deficiency, and transplant rejection); and the ...

Cannabinoids are a diverse group of herbal, endogenous, and synthetic compounds that bind to specific inhibitory receptors in the body. The
most common source of cannabinoids is the Cannabis plant, which has been used recreationally, industrially, and medicinally for thousands of years. In modern times, few substances have carried more stigma or ignited more debate.

**Role of Cannabinoids in Pain Management** - ScienceDirect
Ketamine is a medication mainly used for starting and maintaining anesthesia. It induces a trance-like state while providing pain relief, sedation, and memory loss. Other uses include for chronic pain, sedation in intensive care, and depression. Heart function, breathing, and airway reflexes generally remain functional. Effects typically begin within five minutes when given by injection and ...
