Chapter 8 The Digestive System

ICD-10 is an international statistical classification used in health care and related industries. Produced by the World Health Organization, it is used in several countries around the world. Some have gone on to develop their own national enhancements, building off the international version of the classification.

**ICD-10 Chapter XI: Diseases of the digestive system**

Digestion is the mechanical and chemical breakdown of food into small organic fragments. It is important to break down macromolecules into smaller fragments that are of suitable size for absorption across the digestive epithelium.

**15.3 Digestive System Processes – Concepts of Biology-1st**

The function of the digestive system is to break down the foods you eat, release their nutrients, and absorb those nutrients into the body. Although the small intestine is the workhorse of the system, where the majority of digestion occurs, and where most of the released nutrients are absorbed into the blood or lymph, each of the digestive system organs makes a vital contribution to this.

A comprehensive database of more than 99 digestive system quizzes online, test your knowledge with digestive system quiz questions. Our online digestive system trivia quizzes can be adapted to suit your requirements for taking some of the top digestive system quizzes.

**Digestive System Quizzes Online, Trivia, Questions**

The human digestive system consists of the gastrointestinal tract plus the accessory organs of digestion (the tongue, salivary glands, pancreas, liver, and gallbladder). Digestion involves the breakdown of food into smaller and smaller components, until they can be absorbed and assimilated into the body. The process of digestion has many stages. The first stage is the cephalic phase of ...
